

What is a list of data structures that a competitive programmer must know?

Sameer Gulati · Updated August 12, 2019
International Master at Codeforces

This is a comprehensive list of Data Structures and Algorithms used in Competitive Programming with tutorials, implementations and problems. Use this list in conjunction with this strategy ([Sameer Gulati's answer to What made you good at competitive programming?](#)). I originally posted this list on the [Codechef Discuss](#) Forum. Moving forward I will be keeping this list updated here on Quora:

- Binary Search :
[Tutorial](#), [Problems](#), [Tutorial](#), [Implementation](#), [Problem](#)
- Quicksort :
[Tutorial](#), [Implementation](#), [Tutorial](#)
- Merge Sort :
[Tutorial](#), [Implementation](#), [Tutorial](#)
- Suffix Array :
[Tutorial](#), [Tutorial](#), [Implementation](#), [Tutorial](#), [Implementation](#), [Problem](#), [Problem](#)
- Knuth-Morris-Pratt Algorithm (KMP) :
[Tutorial](#), [Tutorial](#), [Implementation](#), [Tutorial](#), [Problem](#)
- Rabin-Karp Algorithm :
[Tutorial](#), [Implementation](#), [Tutorial](#), [Problem](#), [Problem](#)
- Tries :
[Tutorial](#), [Problems](#), [Tutorial](#) : I, II, [Tutorial](#), [Problem](#), [Problem](#), [Problem](#)
- Depth First Traversal of a Graph :
[Tutorial](#), [Implementation](#), [Tutorial](#), [Problems](#), [Problem](#), [Problem](#), [Problem](#)
- Breadth First Traversal of a Graph :
[Tutorial](#), [Implementation](#), [Tutorial](#), [Problems](#), [Problem](#), [Problem](#), [Problem](#), [Flood Fill](#)
- Dijkstra's Algorithm :
[Tutorial](#), [Problems](#), [Problem](#), [Tutorial\(greedy\)](#), [Tutorial \(with heap\)](#), [Implementation](#), [Problem](#), [Problem](#)
- Binary Indexed Tree :
[Tutorial](#), [Problems](#), [Tutorial](#), [Original Paper](#), [Tutorial](#), [Tutorial](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#)
- Segment Tree (with lazy propagation) :
[Tutorial](#), [Implementation](#), [Tutorial](#), [Tutorial](#), [Problems](#), [Implementation](#), [Tutorial](#), [Implementation and Various Uses](#), Persistent Segment Tree: *62, II, problems same as BIT, [Problem](#), [Problem](#)/HLD is used as well/
- Z algorithm :
[Tutorial](#), [Problem](#), [Tutorial](#), [Tutorial](#), problems same as KMP.
- Floyd Warshall Algorithm :
[Tutorial](#), [Implementation](#), [Problem](#), [Problem](#)
- Sparse Table (LCP, RMQ) :
[Tutorial](#), [Problems](#), [Tutorial](#), [Implementation\(C++\)](#), [Java implementation](#)
- Heap / Priority Queue / Heapsort :
[Implementation](#), [Explanation](#), [Tutorial](#), [Implementation](#), [Problem](#), Chapter from CLRS
- Modular Multiplicative Inverse
- Binomial coefficients ($nCr \% M$): [Tutorial](#), [Tutorial](#), [Paper](#) (Link Not Working), [Problem](#)
- Suffix Automaton :
[Detailed Paper](#), [Tutorial](#), [Implementation \(I\)](#), [Tutorial](#), [Implementation \(II\)](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Tutorial](#), [Implementation](#)

- Counting Inversions :
[Divide and Conquer](#), [Segment Tree](#), [Fenwick Tree](#), [Problem](#)
- [Euclid's Extended Algorithm](#)
- Suffix Tree :
[Tutorial](#), [Tutorial](#), [Intro](#), [Construction : *106](#), [II](#), [Implementation](#), [Implementation](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#)
- Dynamic Programming :
Chapter from CLRS(essential), [Tutorial](#), [Problems](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Tutorial](#), [Problem](#), [Problem](#), [Problem](#), [Longest Increasing Subsequence](#), [Bitmask DP](#), [Bitmask DP](#), [Optimization](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [DP on Trees : *134](#), [II](#)
- Basic Data Structures :
[Tutorial](#), [Stack Implementation](#), [Queue Implementation](#), [Tutorial](#), [Linked List Implementation](#)
- [Logarithmic Exponentiation](#)
- Graphs :
[Definition](#), [Representation](#), [Definition](#), [Representation](#), [Problem](#), [Problem](#)
- Minimum Spanning Tree :
[Tutorial](#), [Tutorial](#), [Kruskal's Implementation](#), [Prim's Implementation](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#)
- [Efficient Prime Factorization](#)
- Combinatorics :
[Tutorial](#), [Problems](#), [Problem](#), [Tutorial](#)
- Union Find/Disjoint Set :
[Tutorial](#), [Tutorial](#), [Problems](#), [Problem](#), [Problem](#), [Problem](#)
- Knapsack problem :
[Solution](#), [Implementation](#)
- Aho-Corasick String Matching Algorithm :
[Tutorial](#), [Implementation](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#)
- Strongly Connected Components :
[Tutorial](#), [Implementation](#), [Tutorial](#), [Problem](#), [Problem](#), [Problem](#)
- Bellman Ford algorithm :
[Tutorial](#), [Implementation](#), [Tutorial](#), [Implementation](#), [Problem](#), [Problem](#)
- Heavy-light Decomposition :
[Tutorial](#), [Problems](#), [Tutorial](#), [Implementation](#), [Tutorial](#), [Implementation](#), [Implementation](#), [Problem](#), [Problem](#), [Problem](#)
- Convex Hull :
[Tutorial](#), [Jarvis Algorithm Implementation](#), [Tutorial with Graham scan](#), [Tutorial](#), [Implementation](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#)
- Line Intersection :
[Tutorial](#), [Implementation](#), [Tutorial](#), [Problems](#)
- [Sieve of Eratosthenes](#)
- Interval Tree :
[Tutorial](#), [Implementation](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Tutorial](#)
- [Counting Sort](#)
- [Probabilities](#)
- Matrix Exponentiation :
[Tutorial](#), [Tutorial](#)
- Network flow :
(Max Flow)[Tutorial](#) : I, II, [Max Flow\(Ford-Fulkerson\) Tutorial](#), [Implementation](#), (Min Cut) [Tutorial](#), [Implementation](#), (Min Cost Flow)[Tutorial](#) : I, II, III, [Dinic's Algorithm with Implementation](#), [Max flow by Edmonds Karp with Implementation](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#)

- [Deque](#)
- Binary Search Tree :
[Tutorial](#), [Implementation](#), [Searching and Insertion](#), [Deletion](#)
- Quick Select :
[Implementation](#), [Implementation](#)
- Treap/Cartesian Tree :
[Tutorial\(detailed\)](#), [Tutorial](#), [Implementation](#), [Uses and Problems](#), [Problem](#), [Problem](#)
- Game Theory :
[Detailed Paper](#), [Tutorial](#), [Problems](#), [Grundy Numbers](#), [Tutorial with example problems - I](#), [II](#), [III](#), [IV](#), [Tutorial](#), [Problems](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#), [Nim](#)
- STL (C++) :
[I](#), [II](#), [Crash Course](#)
- Maximum Bipartite Matching
- Manacher's Algorithm :
[Implementation](#), [Tutorial](#), [Tutorial](#), [Implementation](#), [Tutorial](#), [Implementation](#), [Problem](#), [Problem](#), [Problem](#)
- Miller-Rabin Primality Test : [Code](#)
- Stable Marriage Problem
- Hungarian Algorithm, [Tutorial](#)
- Sweep line Algorithm : [I](#), [II](#)
- LCP :
[Tutorial](#), [Implementation](#), [Tutorial](#), [Implementation](#)
- Gaussian Elimination
- Pollard Rho Integer Factorization, [problem](#)
- Topological Sorting
- Detecting Cycles in a Graph : Directed - [*293](#), [II](#) Undirected : [*295](#)
- Geometry : [Basics](#), [Tutorial](#)
- Backtracking :
[N queens problem](#), [Tug of War](#), [Sudoku](#)
- Eulerian and Hamiltonian Paths :

3K

134

28

- Graph Coloring :
[Tutorial](#), [Implementation](#)
- Meet in the Middle :
[Tutorial](#), [Implementation](#)
- Arbitrary Precision Integer(BigInt) , [II](#)
- Radix Sort, [Bucket Sort](#)
- Johnson's Algorithm :
[Tutorial](#), [Tutorial](#), [Implementation](#)
- Maximal Matching in a General Graph :
[Blossom/Edmond's Algorithm](#), [Implementation](#), [Tutte Matrix](#), [Problem](#)
- Recursion : [I](#), [II](#), [Towers of Hanoi](#) with [explanation](#)
- Inclusion and Exclusion Principle : [I](#), [II](#)
- Co-ordinate Compression
- Sqrt-Decomposition :
[Tutorial](#), [Tutorial](#), [Problem](#), [Problem](#)
- Link-Cut Tree :
[Tutorial](#), [Wiki](#), [Tutorial](#), [Implementation](#), [Problem](#), [Problem](#), [Problem](#), [Problem](#)

- Burnside Lemma : [Tutorial](#), [Tutorial](#), [Problem](#)
- Edit/Levenshtein Distance : [Tutorial](#), [Introduction](#), [Tutorial](#), [Problem](#), [Problem](#)
- Branch and Bound
- Math for Competitive Programming
- Mo's Algorithm : [Tutorial and Problems](#)

PS: I've linked this Quora answer to the original Codechef post.

PPS: Please do not post/share outside Quora without giving credit.

Edit 1: Fixed the broken Topcoder links.

Sameer, thank you so much for writing this answer.

It is going to help many people.

Tushar Laddha · August 10, 2019

Sameer Sir, how much month time it took for you to complete all of this, and moreover what is your trick to retain them in your brain.

4 Reply

Sameer Gulati · August 10, 2019

You don't need to do all of this. Just follow this strategy : [Sameer Gulati's answer to What made you good at competitive programming?](#) Use the list as a reference to learn something new you encounter or maybe revision

Akshit Aggarwal · August 3, 2019

That is a great list. It is randomly written or should someone who's doing CP for a couple of months can start studying the topics top to bottom?

1 Reply

Sameer Gulati · August 3, 2019

Randomly. I am gonna write a how to start CP answer soon. Just follow that and use this list when you need to learn a topic.

Greeshma Thank you so much.

Himanshu Bharti · August 2, 2019

Thanks for sharing this. Much useful to me.

3 Reply

Lavish Saluja · August 17, 2019

Can you also write in what order one should start getting a grasp on all these topics?

An awesome answer though. Thanks :)

I wouldn't recommend that approach. Follow this: [Sameer Gulati's answer to what made you good at competitive programming?](#) and use this list for help when you encounter a new concept.

2 [Reply](#)

Lavish Saluja I don't specifically want to get good at competitive programming. I want to be...
